COW ACTIVITY & HEALTH MONITORING SYSTEMS

Much more than activity. BouMatic RealTime Health Monitoring Solution allows you to know your cows' activity, feeding, ruminating, walking and laying down behaviors.

A health snapshot of your cows on time, anytime.

- **Activity** – Ability to identify cows requiring attention for servicing or for potential preventive health treatment
- **In barn or Out barn** – The activity controller will read any tag within 350ft (100m) for use in barn or central location. And using same controller it can read any tag within 2500ft (750m) for out of barn installations, great for dry/open pasture-based farms.
- **Eating time** – Monitors additional animal health parameters in relation to their feed intake behavior
- **IDs anywhere** – There is no need for the animal to walk through a parlor ID portal making it ideal for heifers and dry cows
- **Advanced herd management** – Use with HerdMetrix™ to provide you flexibility in the reporting to tune it to your own management style
- **Accessible** – NEW BouMatic HerdMetrix™ phone app makes data accessible anywhere, anytime
